Mission

“To be Earth’s most customer-centric company, where customers can find and discover anything they might want to buy online.”

Vision

“To be Earth’s best employer and Earth’s safest place to work.”

1. Introduction of the Organization

Amazon is one of the most influential and globally recognized companies in the world, known for transforming traditional retail and setting new standards for digital commerce. Founded in 1994 by Jeff Bezos, Amazon began as a small online bookstore operating out of a garage in Seattle. Over the years, it evolved into a massive multinational corporation offering products and services across countless categories, including electronics, apparel, digital media, cloud computing, artificial intelligence, logistics, and device manufacturing. The organization’s growth is largely attributed to its customer-centric approach, continuous technological innovation, and highly efficient operations network. Amazon’s mission to be *“Earth’s most customer-centric company”* has guided its strategies, encouraging the company to constantly improve delivery speed, product variety, and shopping convenience. Today, Amazon operates in more than 100 countries, employs over a million people globally, and remains a pioneer in e-commerce, automation, and global supply chain management.
